OUR HISTORY

AK BORU®

Thanks to our esteemed founder Mr. Suleyman Alkan, our company was established 1955 in Istanbul, Turkey. In our earlier years, we mostly in specialized metalwork such as pipe manufacturing. Period of time, our company started to garner attention and praise from the industry for our quality products. Over time, we extended our portfolio of products and became one of the leaders in our field.

Our company kept growing, and in 1998 was converted to an LLC.

Towards the end of 2008, we started LED underwater and pool lighting, which requires high manufacturing technology. We developed a very innovative system in PAR56 class pool light bulbs and surface-mounted pool light bulbs, and launched the first technological products in the world and in Turkey. While our country and the world are in search of energy saving product, our company has started to limit its LED production to only energy-saving and environment-friendly product.

Since 2012, we have taken our experience from underwater pool lighting technology to a higher level and added underwater Yacht and Boat lighting to our production tree. In order to increase our product quality and intensify our international trade, our products have CE and CB certificates. All the products we have made are produced within our company and exported to many countries of the world, especially to America and European countries. As an innovative and quality-loving company, we will be in the desire to continue to offer you higher quality products with our special design.

In 1980, Mr. Alkan and his three friends started and organized a modern industrial park, Istanbul Dogu Industrial Park. Our company shortly moved to this new site due to our increasing need for industrial space.

AK BORU ELEKTRİK CO. LTD.

Since 1999, we have started to manufacture on garden lighting. In the following years, we have increased the production range of many garden fixtures made of Stainless steel, Aluminum and special durable Resin materials day by day.

After the first days of 2010, we started to maximize our machinery, mold and electronic engineering investments. We manufacture many LED underwater and pool lighting and cases, garden lighting from stainless steel, aluminum and special plastics, solar panel lighting, implementation of ceiling lighting with LED, wall lighting. Most of them are genuine and industrial design patented. With the desire of our company to focus on continuous quality, we have certified our management style with ISO9001:2015.

CORPORATE MANAGEMENT

Süleyman ALKAN

General manager

Founder of the company. He pioneered many innovations with groundbreaking inventions in the design and manufacture of machines.

Zafer ALKAN

Export & Finance

Designer of new products as well as the study R&G. Creator of patents for innovative works and products. Owner of the patent for cooling swimming-pool bulbs PAR 56.

Ali ALKAN

Purchasing & Procurement

He is specialized in finance and planning. He provides the production and development plans of the factory.

Hasan Kamil ALKAN

Director of Manufacturing and Projects

Training in production and design
From 3D plans, he provides the steps of production and manufacturing of our products. Expert in molding and tooling. He realizes part of the manufacturing of our machines and our molds.

AL 4145

Universal Adjustable Frame Underwater Pool Lighting

PATENTED PRODUCT

Product Description:

The AL 4145 model combines aesthetics and efficiency in your pool, offering a user friendly underwater light. This model stands out with its patented adjustable frame, which adapts to different pool housings available in the market. Thanks to the adjustable tightening clips of our newly designed product, it can be applied to all pool housings with diameters ranging from 20 to 28 mm. Its slim design creates a sleek and elegant look in your pool.

Product Features:

Frame Color Options: White, Anthracite, Stainless Steel

Frame Adjustability: Adjustable for diameters between 20 cm and 28 cm

Lighting Type: Compatible with AL SFPAR56 Slim Model PAR56 Lamp

Material: Eco-friendly, UV-resistant, corrosion-resistant, and suitable for underwater use

Quaranty: 2 years

Installation: Easy frame and light replacement

PATENTED PRODUCT AL SFPAR56 TR

24 MM SLIM DESIGN PAR56 BULB

ADVANTAGES:

- The lamp has a heat-transferred body. The heat does not raise the temp of the body. Quik shift of the LED temp to water.
- Thermal resin polymer body is resistant towards pool chemicals.
- Do not occur the corrosion because of water.
- The glass of lamp is high resistant towards impact and U.V.
- It has long life and high light.
- The all electronic circuit board must be cooled.
- This lamp is more high light according to other led bulbs.
- Usable in the salt water.
- 2 years quaranty

SPECIFICATIONS:

- 42W White and Warm White colours are 4200 lumen
- 42W Blue colour is 2520 lumen
- 60W White and Warm White colours are 6000 lumen
- 60W Blue colour is 3600 lumen
- 30W & 50W RGB 3 chipped full colour LED
- 30W & 50W RGB 3 chipped full colour LED with two wire (No need the wireless control)
- Two wired RGB lamp is change the colour with ON/OFF

WHAT IS THE DIFFERENCE OF THERMAL RESIN MATERIAL

- The thermal resin is high heat transfered a polymer material.
- The thermal resin is a new and high-tech products with high heat transfered.
- Our patented cooling body eliminates heat generated on the LEDs as the design. Therefore it has much longer life than other LED bulbs.
- Thermal resin polymer body is resistant towards pool chemicals.
- The U.V. protected glasses is not broken and shock resistant towards impact. So the glass do not create a dangerous cutting in the pools.

PATENTED MINI DESIGN SURFACE MOUNTED POOL LIGHTING

AL 4115 -12W

AL 4135 - 42W

AL 4125 -24W

ADVANTAGES :

- This lamp can use underwater, pool and pool's steps.
- It has so slim and stylish design.
- Thanks to the thermal resin body is long life work.
- The glass of this product resistant towards to impact and UV protected.
- Easy and simple installation.
- It has high light
- Thermal resin polymer body is resistant towards pool chemicals.
- No corrosion.
- Usable in the salt water
- Recycleable Eco-Friendly materials.

WHAT IS THE DIFFERENCE OF THERMAL RESIN MATERIAL:

- The thermal resin is high heat transfered a polymer material.
- The thermal resin is a new and High-Tech products with high heat transfered.
- Our patented cooling body eliminates heat generated on the LEDs as the design. Therefore it has much longer life.
- Thanks to the High-Tech body affected by pool chemical.
- The U.V. protected glasses is not broken and shock resistant towards impact. So the glass do not create a dangerous cutting in the pools.

AL 4075 LINER

THE POOL LIGHTING FOR LINER POOLS AND JACUZZI

ADVANTAGES :

- This lamp is designed to be use in the liner pools and jacuzzi.
- We are produce with High-Tech thermal resin polymer to this lamp.
- Thermal resin polymer is transfer the heat to water quickly.
So the LEDs can work long life.
- Thermal resin polymer body is resistant towards pool chemicals of pools and water.
- Easy and simple installation
- Usable in the salt water
- No corrosion.

SPECIFICATIONS :

- 15W. White and Warm White colour is 1500 lumen
- 15W. Blue colour 800 lumen
- 9W. RGB 3 chiped full colour LED.
- IP68 CLASS III 12 VDC

WHAT IS THE DIFFERENCE OF THERMAL RESIN MATERIAL:

- The thermal resin is high heat transfered a polymer material.
- The thermal resin is a new and High-Tech products with high heat transferred.
- Our patented cooling body eliminates heat generated on the LEDs as the design.
Therefore it has much longer life.
- Thanks to the High-Tech body affected by pool chemical.
- The U.V. protected glasses is not broken and shock resistant towards impact.
So the glass do not create a dangerous cutting in the pools.

AL 2061, AL 2071 & AL 2081 SERIES

STAINLESS STEEL SURFACE MOUNTED POOL LIGHTING

Product Description:

Designed to create a stunning atmosphere, our AL 2061, AL 2071, and AL 2081 models cater to every need with three different diameter and watt options. The AL 2061 model meets the need for gentle lighting with its 6x4W power, while the AL 2071 model is ideal for medium-sized areas with its 8x4W output. For larger spaces, the AL 2081 model stands out with its powerful 18x4W illumination.

These lights are made from AISI 316L quality stainless steel, offering an elegant and durable design. With color options of white, daylight, blue, and RGBW, you can enhance your spaces as you wish. Their surface-mounted structure makes them safe to use in pools, decorative ponds, and docks.

Our products simplify the installation process with cable holes at the back. The use of 2x1 RNF marine cable enhances durability, while high-quality 3535 LEDs provide strong light distribution. The stainless steel body ensures the LEDs remain at an ideal temperature for long-lasting use. Additionally, the impact-resistant glass structure guarantees safe usage.

The AL 2061, AL 2071, and AL 2081 series is the most stylish way to illuminate your spaces with aesthetic appeal and high performance.

AL 4085
UNDERWATER FOUNTAIN
LIGHTING

AL 4095
UNDERWATER FOUNTAIN
LIGHTING

ADVANTAGE

- This lamp is designed to be use in the fountain pools
- Low energy consumption
- Thermal Resin Polymer is transfer the heat of body thanks to poultry partitions to water quickly. So the LEDs can work long life.
- The all metal equipments is AISI 316L Stainless Steel.
- The glass is U.V. protected and resistant towards to impact.
- The stainless steel product has tempered glass.
- All products are corrosion resistant.
- Easy and simple installation.
- The products is according to 1" and 1.5" pipes.
- RGB and RGBW LEDs are full colour.
- AISI 316L quality stainless steel cover.
- Recycleable Eco-Friendly materials.
- 2 years quaranty.

LED LIGHTING CONTROLLERS

AL TC01-RGB

RGB TOUCH CONTROLLER

Input Volt : DC 12V - 24V
Output Volt : 12V:<288W,
 24V:<576W
Power : 6Ax3
Output : 3 Channel

Specifications

- RF remote touch control with 5 functions, 1 color ring, and a central color sense lamp.
- 128-level color ring with full-touch buttons.
- Supports color changing and brightness dimming.
- Wide voltage range: DC12V-24V with reverse polarity protection.
- 9 modes: 7 dynamic modes, with adjustable brightness and speed.
- RJ45 connector enables synchronization across multiple controllers and long LED strip setups.

IP20   CLASS III

AL TC02-RGBW

RGBW TOUCH CONTROLLER

Input Volt : DC 12V - 24V
Output Volt : 12V:<288W,
 24V:<576W
Power : 6Ax4
Output : 4 Channel

Specifications

- RF remote touch control with 5 functions, 1 color ring, and a central color sense lamp.
- Music Control Mode
- 128-level color ring with full-touch buttons.
- Supports color changing and brightness dimming.
- Wide voltage range: DC12V-24V with reverse polarity protection.
- 9 modes: 2 static white and 7 dynamic modes, with adjustable brightness and speed.
- RJ45 connector enables synchronization across multiple controllers and long LED strip setups.

IP20   CLASS III

AL TC03-DIMMER

DIM TOUCH CONTROLLER

Input Volt : DC 12V - 24V
Output Volt : 12V:<216W,
 24V:<432W
Power : 6Ax3
Output : 3 Channel

Specifications

- RF remote touch control with 1 color ring.
- Supports color changing and brightness dimming.
- Wide voltage range: DC12V-24V with reverse polarity protection.
- 3 dynamic modes, with adjustable brightness and speed.
- RJ45 connector enables synchronization across multiple controllers and long LED strip setups.

IP20   CLASS III

AL RGBW/RGB POWER UNIT

AMPLIFIER

Input Volt : DC 12V - 24V
Output Volt : 12V - 24V
Power (RGBW): 4x27,5A 1320W-12V (Four Channel)
 4x27,5A 2640-24V (Four Channel)
Power (RGB) : 3x27,5A 990W-12V (Three Channel)
 3x27,5A 1980-24V (Three Channel)

Specifications

- DC 12V - 24V input and provides matching 12V - 24V output.
- Delivers 1320W at 12V and 2640W at 24V for RGBW; 990W at 12V and 1980W at 24V for RGB.
- 4 channels for RGBW and 3 channels for RGB ensure flexible and efficient lighting control.
- Durable aluminum casing provides effective heat dissipation for long-lasting performance.
- Designed for high-power applications, maintaining stable output in continuous operation.

IP20   CLASS III

AL RC01 ON/OFF 220V ON/OFF CONTROLLER

Input Volt : 220V
Output Volt : 220V
Power : 1000W

Specifications

- The operating range of the product is suitable for 220-240 Volt, 50-Hz.
- The product cannot be dimmed.

IP20   CLASS III

AL TRNS-300

RESIN-FILLED TRANSFORMER

Input Volt : 220V.
Output Volt : 13 VAC
Power : 300W.

Specifications

- Converts 220V to 12V AC for safe underwater lighting.
- Fully encapsulated in resin for waterproofing and durability.
- Prevents electrical hazards with high-level insulation.
- Designed to withstand moisture, chemicals, and harsh environments.
- Ensures stable output and long lifespan in continuous operation.

AL UWL301 TH**THRU-HULL UNDERWATER YACHT LIGHTING**

BOAT SIZE : 7-25 mt. / 25-80 ft.

- The resistant toward salt water thanks to Aluminium Bronze body
- Reinforced Aluminum replaceable inner core housing
- The High-Tech Power Led has high watt. Every LED is 4 Watt
- Every LED has 140-150Lumen
- RGBW full colour LED
- 8 mm Shockproof Tempered Glass
- 2x1,5 mm² Neopren RNF cable.
- No need to dismantle the entire product when changing LEDs
- Easy to replace by loosening the aluminum lighting capsule from inside the boat.
The Aluminum Bronze body remains fixed on the boat.
- You can be connected AHD 2MP 1080P camera to the same housing optionelly.

AL 2012 SERIES READING LIGHT

Crafted from high-quality AISI 316L stainless steel, our new reading lamp offers exceptional resistance to corrosion and impacts, making it perfect for indoor and outdoor use. With a 9V-31VDC operating range, it adapts to various power sources, ideal for yachts, caravans, or bedside use.

Equipped with 3 POWER LEDs, it delivers 3W and 300 lumens of bright, balanced light that minimizes eye strain. The lamp can be easily operated using the switch or touch control panel. An optional USB port (5V 3A) is available for convenient device charging, making it a versatile lighting solution for any setting.

AL 2012 MIRA / USB USB Charging

- Constructed from AISI 316L stainless steel for exceptional resistance to corrosion and impact.
- Compatible with a variety of power sources, thanks to its 9V-31VDC input range.
- Features 3W power output and 300 lumens of brightness with balanced light distribution.
- Simple switch or touch-sensitive controls for effortless on/off functionality.
- Supports 5V 3A charging, providing a convenient way to power your devices.
- Low energy consumption and extended LED lifespan.
- Suitable for yachts, caravans, bedside use, or reading corners.
